PRICE LIST 2/15/60/A
(Cancels all previous lists)

IN BRIGHT RED MAILING TUBES

New! Different! You will be delighted to discover the way that these are packed! The mailing tube is in two parts, one telescoping partly within the other, sealed with strong tape. The longer portion protects the Holly foliage and the shorter end acts as a pot to hold the root ball of the Holly. The leafmold rootball is polybagged to assure safe arrival in fresh moist condition ready for you or your friends to plant. Here indeed is a sensible economical way to buy the Hollies that you have always wanted!

REGULAR SIZE

Our largest and best yearlings selected and transferred from four inch pots. Some are nearly a foot in height with none less than six inches above the pot. We believe these to be the best of their age that you can buy today! Shipped individually in 3½ by 14 inch long tubes. Only \$1.98 each postpaid. Your choice of sex and variety. Order now. (Handy order form enclosed)

KING SIZE

A big two year old 'Perfection' female Holly 1½ to 2 feet in height above the root ball. And that's not all. To help you with pollination we also include a small male Holly in each package! Both shipped together in a big 6 by 30 inch long tube. Only \$4.75 postpaid. Order now. (Handy order form enclosed)

IN BRIGHT RED CARTONS

Cheerful new package! Same wonderful quality! Three Hollies in one carton. Shipped in four inch pots polybagged for safe moist travel. A full 6 to 9 inches high above the pot. Your choice of variety and sex. Only \$4.98 for three happy Hollies postpaid. Order now. (Handy order form enclosed)

LARGER HOLLIES BY RAIL EXPRESS

There are lots of nice Hollies in the field in three to six foot sizes. Price varies with age and width with tree forms averaging four to seven dollars per foot. Broader older bush forms cost more. Use the handy order form to tell us the height width and shape that you wish and we'll write back with suggestions and prices.

PLANTING MATERIALS (See "Holly is Easy to Grow" pamphlet for directions)

Bushel bags, one of Oak Leafmold, one of tobacco stems. We pay the freight East of the Mississippi. When you consider what freight rates are these days I believe that you will agree that this is a real bargain at \$5.95 delivered to your nearest freight office! Use handy order form enclosed.

STATEMENT OF QUALITY

Our Hollies are sex guaranteed and each one is variety labeled. Our American Holly varieties will withstand -20 below zero when planted in quiet locations. They're early-berrying because they are grown from rooted cuttings taken from mature "Mother" trees with excellent berrying habits. Our Hollies have a record of living and growing from Kansas to Massachusetts for we've been known for hardy Hollies for more than forty years! Order now with confidence.

VARIETY LIST

AMERICAN HOLLY (Ilex Opaca Varieties)

Heavy-berrying female varieties

- | | |
|-----------------------|--------------|
| > 'Cardinal Improved' | 'Farage' |
| 'Old Heavy Berry' | 'Perfection' |
| 'Big Red' | 'Hedgeholly' |

These red berried beauties have been carefully selected from among the more than fifty varieties that we have tested and grown at our nursery over the past forty years. You will find them "hard to beat" in the "Holly world" today. The differences among them are the little things that make it interesting to own them all. Why not treat yourself or your friends to a collection now! Use handy order form enclosed.

Unusual varieties

----- This list may reveal to you a Holly that you have always wanted! Here could be just the gift for someone hard to please. In this list you will find exotic and unusual Hollies that you will want to call your friends over to see!

- Ilex Opaca 'Canary' female - Bright yellow berries!
- *Ilex Opaca 'Maryland Dwarf' female - Grows low, much broader than tall.
- #*Ilex Aquifolium Argentea Marginata female - Silver Variegated (edged) leaves.
- #*Ilex Aquifolium Camelliaefolia female - Lovely purplish green winter foliage.
- #Ilex Aquifolium Angustifolia sterile - Tiny narrow Holly leaves - Delightful!
- #Ilex Aquifolium ferox sterile - "Porcupine" - Spines on top the leaf, too!
- Ilex Ciliospinosa female - Small leaves with "mild" spines slanted forward!
- #Ilex Pernyi female - Tiny leaves, sharp spines, open "fronded" foliage.

Pollenator males

- Opaca Male - Will cause berries to form on any American Holly (Ilex Opaca) female.
- #Aquifolium Male - Will cause berries to form on Ilex Aquifolium females.
- #Aqui-Pernyi Male - Will cause berries to form on Pernyi females.
- Ciliospinosa Male - Will cause berries to form on Ciliospinosa females.

Key

Varieties marked # prefer shaded windsheltered locations. The E or NE side of the house, evergreen grouping, wall, etc. often provides natural windprotection and sufficient shade. Varieties marked * do not berry well when small but may berry well when large. (They are popular for beauty of foliage or unique growth habit). Sterile varieties flower but do not berry. Except as noted in this key all other female varieties berry heavily and are early-berrying. All Hollies on this list are evergreen with stickery leaves. All females are red-berried except 'Canary' which has bright yellow berries.

Help in locating other varieties not on this list

Send leaf sample, sketch, common name, latin name, etc., and we'll try to help you locate a source. We also stock small quantities of many varieties not on this list. Variety identification, Holly "problems" solved. Stamps appreciated.
